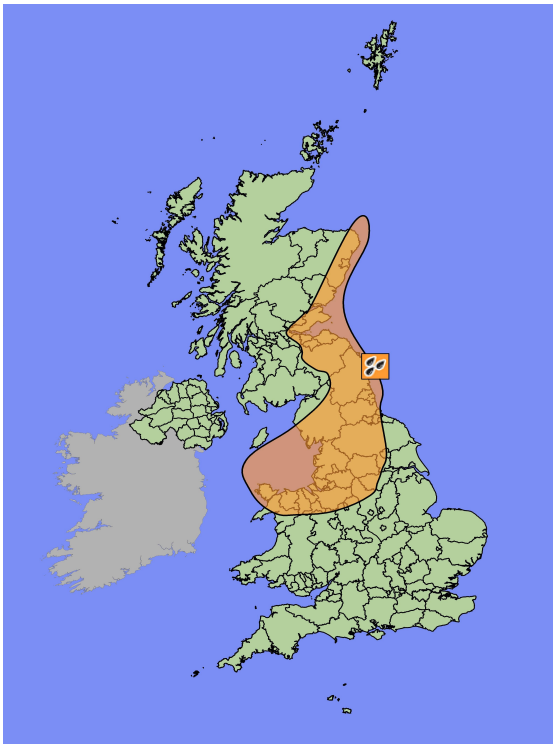
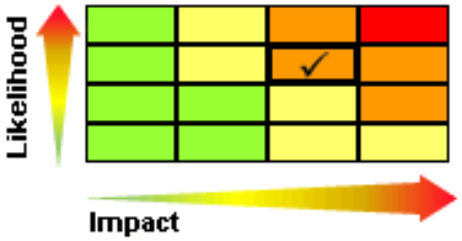
National Severe Weather Warning Service





Chief Forecasters Assessment
An area of low pressure will move north across eastern England and the North Sea during Monday night before becoming slow moving for a time early Tuesday morning near the border of England and Scotland. The depression will be associated with periods of heavy prolonged rainfall as well as very strong winds, particularly across parts of northeast England and eastern Scotland.

Some large rainfall totals are expected, with a further 25-50 mm falling over parts of northern England and northwest Wales in particular. Following the heavy rain during Monday, this will cause further flooding.

The strength of the wind will also become an important factor for parts of northeast England and eastern Scotland, with northeasterly gales bringing gusts of 50 to 60 mph inland and as much as 70 mph to some coastal areas and high ground.

This warning will be updated again before 1000 hours on Tuesday.

The Met Office have issued an **Amber Warning** of **Rain**

Valid from **22:50 on Mon, 24th Sep 2012** until **10:00 on Tue, 25th Sep 2012**

Prolonged periods of heavy rain are likely to occur across parts of northern England, northern Wales and southeast Scotland during the rest of Monday night and well into Tuesday. In addition to the heavy rain, winds will increase to brings gales, and locally severe gales, particularly over high ground of northern England and eastern Scotland. The worst of the severe gales will affect eastern parts of Scotland between 0600 and 0900 on Tuesday morning.
